SELECTION BOOK
BIKE GENERATION 4

The FIVE brand, available in 50 countries across five continents, bases its development on a simple principle: you can't design a pair of gloves like you design an item of clothing.
When you're on a motorbike, the glove isn't just an accessory, it tells the bike how you're feeling. Whether you're overtaking, braking as you reach a bend or making sure you get every last bit of juice from the engine, it's responsible for so many decisions that can influence performance and safety.
That's why FIVE's sole aim is to develop and produce the most advanced gloves, using cutting-edge technology and drawing on our wealth of racing experience. Comfort, protection, precision, design... your hands will feel the difference!
