WHY FIVE?

PROTECTION / FITTING / DESIGN: Five's DNA.

We are glove specialists, and pride ourselves on making what some consider the best gloves ever created. Not that we're smarter than other equipment brands, but simply because we only do gloves. All of our resources, human, technical, and financial, are devoted to a single product: gloves!

Every day, every hour, every minute, we are dedicated to the design, development, and production of top-quality gloves. Why? Because we're convinced that the glove is an essential part of riders' equipment, and it shouldn't be considered a mere "fashion statement".

The hand is both complex and fragile, since it's so exposed in a fall. It's made up of a large number of small parts: joints, bones, muscles, tendons, nerve endings. Designing a product that fits these constraints isn't so simple. The hand is, more than anything, essential to our daily lives. So, it's essential to protect it properly, with a glove that's right for your sport. A FIVE glove, obviously. You can't design a glove in the same way you design a jersey. It has to be protective*, comfortable, durable, breathable, and fit the rider's hand to transmit every movement without restriction. And this is truly a matter for specialists!

Of course, on a bike, you pedal with your legs, but steering precision and finesse is expressed... through the handlebar!

Gloves are therefore the vital link between you and your bike. Because, it's a matter of faithfully reproducing through the handlebars what the rider has in mind. We have more than 10 years of experience at the highest levels in motorcycle racing (World Championship MotoGP, Superbike, Endurance, Motocross, Enduro, etc...), which has helped us develop absolute mastery of technical constraints, both in terms of steering at high-speed on two wheels, and in reducing the risk of injury to the hand. We've leveraged this experience and, by adapting our concepts to this highly specific activity, we've transferred this knowledge to cycling.

There is a fundamental difference between making a beautiful glove, and making a truly efficient glove. Our goal is to bring you a combination of these elements in just one product.

*Against blisters, against nature elements, against bad weather conditions, or in some cases against a fall. In the case of cycling, only a few of our gloves are certified as personal protective equipment, but wearing a glove is always more protective than not wearing any...

Designing a glove is one thing, but large-scale production, and duplicating its functionality in every size is another matter. We design our own concepts, draw up our own patterns for each and every size, determine the positioning of each protective element and each seam with millimetric precision, and we select all of our materials. The end result is a fit and feel that always provides an optimal compromise between protection and comfort. This remains true, whatever your size. Only a specialist can promise such consistent quality.

***“We design our own
concepts, draw up
our own patterns...”***

We have our own design and development centers in France and Italy, and we manufacture in our very own production facilities. In the end, this makes all the difference. To be sure you're truly convinced, do something very simple: slide your hand into a FIVE glove.

Cycling, in all its forms, is becoming increasingly technical. We believe that this same approach, imbued with a spirit of excellence and technical mastery, is the right one for cycling equipment.

It was this same approach that led to the development of the FIVE Bike Advanced Gloves range, which we'd like to share with you through our Generation5 collection.

MY DREAMS ARE IN MY HANDS.

To become multiple World Champion in several cycling disciplines, such as road, cyclo-cross and cross-country mountain biking, you need unwavering determination and extraordinary willpower. Pauline FERRAND-PREVOT is one of those athletes who's making history in her sport. But beyond the athlete with the exceptional record that the public knows, there's a young woman who's been chasing her dreams since the age of five, when her love of cycling first revealed itself. FIVE also means the gloves that Pauline chose to wear to chase another dream, which would move her even closer to international cycling's top tier. FIVE XR-Pro gloves. Without a doubt, the most effective gloves to help her take, her destiny in hand, yet again.

RC.PRO

The RC PRO Shorty is clearly made for demanding, competition-oriented cyclists. Aimed to those who were refusing to wear gloves so far because they didn't want to lose any of their sensations on the handlebar. There is nothing superfluous about it, leaving it focused on what counts: becoming one with the racer's hand and making them forget they're wearing it, thanks to its Nanofront® palm of only 400 microns thick and its ultra-light and breathable nylon-stretch structure. It's only when you slip it on or off that you remember the RC PRO Shorty is on your hand, because, between those two gestures, its efficiency, obtained through a myriad of small details (all of which are important) and premium materials, takes your performance to the next level. A glove crafted to take you to nothing less than the top of the leader board.

TECHNICAL FEATURES

01. Nanofront® palm construction (made in Japan), for exceptional sensitivity and optimal grip on the handlebars
02. Four-way Stretch Nylon topside construction, for comfort and support
03. Ergonomic, strapless stretch cuff, for total ease
04. Ergofit™ fourchettes between the fingers, for a better-fitting glove
05. Wide silicone print on the palm side for better, looser grip on the handlebars, saving you energy
06. Ventilated palm with laser-cut perforations that reduce perspiration and prevent blister formation
07. 2 mm Gel Cushion between the thumb and index fingers, for optimal comfort in a resting position on the brake lever handle
08. MicroWipe™ inset on the thumb so you can wipe off your forehead or glasses
09. Easy slip-on with the Pull'N'Ride™ tab
10. Easy removal with Easy-Pull-Off™ tabs at the ends of the fingers
11. Second-skin feel, like you're wearing nothing at all

RC.GEL

The RC Gel Shorty offers the perfect balance between comfort and performance. With its Gel comfort cushions on the palm side and between the thumb and index fingers, and an adjustable Velcro® closure system on the cuff, it's just as easy to wear over long distances as it is to take it on and off, for occasional use. It's undoubtedly our most versatile and comfortable road glove, which makes it perfect for most cyclists. This is a glove that will take you far, on long rides, or simply when you want to ride in total comfort.

TECHNICAL FEATURES

01. AX Suede® palm construction with 3 mm gel cushion
02. Topside construction in stretch Nylon / Stretch Twill / 3D Mesh
03. Cuff closure with an adjustment tab plus Velcro®
04. 3 mm Gel Cushion on the palm, for optimal comfort on the handlebars
05. 2 mm Gel Cushion between the thumb and index fingers, for optimal comfort in a resting position on the brake lever handle
06. Fourchettes between the fingers in honeycombed Mesh, for better ventilation
07. Ventilated palm with laser-cut perforations that reduce perspiration and prevent blister formation
08. MicroWipe™ inset on the thumb, so you can wipe off your forehead or glasses
09. Reflective elements so you're visible at night
10. Easy slip-on with a Pull'N'Ride™ tab
11. Easy removal with Easy-Pull-Off™ tabs at the end of the fingers

RC.TRAIL GEL

The RC TRAIL GEL Shorty offers maximum comfort for long rides on the road, trails, or even on city streets. Its topside construction in 4-Way Stretch Spandex®, a material known for its flexibility, makes it supremely comfortable. Its soft 3D logo on the metacarpal zone adds texture to the glove and helps limit scrapes and scratches if you happen to take a spill. Its AX Suede® Deuce synthetic leather palm, featuring a number of 3 mm thick AIR GEL® and silicone inserts, offers exceptional shock absorption and grip on the handlebars. The great fit of the RC TRAIL GEL Shorty stems from the Soft TPR and Velcro® tab integrated into the straight-edged, ergonomic neoprene cuff, and its Pull'N'Ride™ tab. Though it tends to blend in visually, with its tone-on-tone logos, it also makes you feel like you're wearing nothing at all, since it's so comfortable and efficient.

TECHNICAL FEATURES

01. Topside construction / 4 Way Stretch Spandex®
02. Palm / AX Suede® DEUCE
03. Palm, thumb, and metacarpal reinforcements / 3 mm AIR GEL®
04. Silicone Print on the palm, for optimal grip on the handlebars
05. Closure and support / Soft TPR and Velcro® topside adjustment tab / Trim- and seam-free ergonomic neoprene cuff / Pull'N'Ride™ pull tab
06. Easy-Pull-Off™ tabbed removal system on the middle and ring fingers
07. Lycra™ stretch fourchettes between the fingers
08. MicroWipe™ / Micro-terry covering on the base of the thumb, so you can wipe off your forehead
09. Logo / Welded Sonic TPR

RC1

The RC1 counts among FIVE's high-end short road gloves. It aims to ensure optimal comfort when you lean on the handlebars, whatever your hand position may be. Its synthetic palm in abrasion-resistant AX Suede® features numerous AIR GEL® 3 mm pads inserted underneath 3 mm memory foam placed at key points (thenar eminence, hypothenar, thumb) for extreme comfort, and 2 mm gel at the metacarpals to allow for flexing. And one ultimate detail, to enhance foster moisture wicking. As for the other side, it features sublimated Polymesh stretch fabric with finely honey-combed Mesh 2.2 fabric, ensuring both excellent support and effective ventilation. Ventilation that is optimized by the use of breathable Powernet fabric between the fingers. The thumb covered in MicroWipe™ terrycloth allows you to wipe the sweat off your face with one swipe. Taking off your glove is made easy with two tabs integrated into the middle and ring fingers. Ultra-comfortable, stylish, and durable, the RC1 Shorty stands out from the crows with its components and pre-formed ergonomic shape, the perfect companion for long days on the road.

TECHNICAL FEATURES

01. Topside construction / Sublimated Polyester mesh + 2.2 mesh
02. Palm / AX Suede® CINCO
03. Palm and thumb reinforcements / 3 mm AIR GEL®
04. Metacarpal reinforcements / 3 mm memory foam
05. Fourchettes (finger contours) / Breathable Powernet fabric
06. Closure and support / Folded, seamless, stretch polyester mesh + 2 Lycra™ panels
07. On-off system with pull-tabs on middle and ring fingers
08. On-off wrist tab / Pull'N'Ride™
09. Logo / TPR Sonic Welded

RC2

If you only consider the essential to be truly indispensable, then the RC2 Shorty is an excellent choice in short road gloves. Developed following the FIVE ExtraFit concept that focuses on top-quality fit, it features the fundamentals that make a glove pleasant and effective. The RC2 Shorty is particularly ideal for those who want as few elements as possible between their hand and the handlebars. Its AX Suede® synthetic leather palm has no padding nor reinforcements, which means no added thickness, but it offers extra grip on the handle bar. In the same way, the back of the hand is made up of a single piece of stretch sublimated Mesh 2.2 fabric, so that no stitching will alter the sensation of wearing nothing at all. The on-off tab paired with two Lycra™ panels located on both sides makes it easy to slip it on and provides good support, without placing any constraints on the wrist. Extremely lightweight and ventilated, the RC2 Shorty knows how to be discreet, to the point of feeling like a second skin. Just what many exacting athletes need, with nothing more, so they can push themselves to the max.

TECHNICAL FEATURES

01. Topside construction / 2.2 sublimated mesh
02. Palm / AX Suede® CINCO
03. Thumb / MicroWipe™ micro-terrycloth
04. Fourchettes (finger contours) / Breathable Powernet fabric
05. Closure and support / 2.2 stretch mesh + 2 Lycra™ panels
06. On-off system with pull-tabs on middle and ring fingers

RC3

The RC3 Shorty is designed for cyclists who know that it's the essentials that count. By focusing on simplicity, the RC3 Shorty adds nothing superfluous, yet still features everything you need to enjoy riding even more WITH these gloves on than WITHOUT them. A palm that's as smooth as can be, without any reinforcements whatsoever, featuring micro-perforations for improved airflow, a ventilated topside, a Velcro® adjustment tab on the top of the wrist, a micro-terry insert so you can wipe off your forehead, and an Easy-Pull-Off™ system to make it even easier to take off your gloves, all make the RC3 Shorty the ultimate affordable and effective short glove. And no need to say, it offers extra grip on the handle bar. If we add to its reasonable price the wide selection of colors that will help it match most outfits, here we have, no doubt about it, a real bestseller.

TECHNICAL FEATURES

01. Topside construction / Britex Polyester Mesh
02. Palm / AX Suede® Cinco, micro-perforated for ventilation
03. Silicone Print on the palm for optimal grip on the handlebars
04. Closure and support: Velcro® topside adjustment tab on the upper part of the wrist / Pull'N'Ride™ pull tab
05. Easy-Pull-Off™ tabbed removal system on the middle and ring fingers
06. Lycra™ stretch fourchettes between the fingers
07. MicroWipe™ / Micro-terry covering on the base of the thumb, so you can wipe off your forehead
08. Silicon-printed logo

RECOMMENDED FOR

ENDURO 2

Enduro riding means facing all types of terrain, and just as many natural hazards. So, with the ENDURO 2, a glove that is unmatched in the marketplace, we've included just the reinforcements you need at strategic points, for total freedom of movement. Such is the case with the double FIVE ERGOPROTECH™ protective shell in soft TPR, conveniently available in case you hit a tree trunk or rock, while remaining nearly imperceptible when you steer the handlebars. We've specifically paid attention to ventilation, by using mesh fabric on the inner half of the hand. We've also kept the durable materials on the outer half, which is more exposed to all types of friction (from trees, thorns, rocks). And since Enduro means spending long hours at the handlebars, contact points with the controls have to be comfortable and accommodating. The ENDURO 2 thus features a palm made from AX Suede® Durango™, a material that has good grip and is pleasant and durable, and 2 mm foam rubber pads on the palm and 3 mm on the thumb. It's just what you need to go all out, without (too much) pain and suffering.

TECHNICAL FEATURES

01. Topside / Mixed construction, with ventilated mesh on the inner side and ultra-durable polyester 4-way stretch on the outer side
02. Palm / AX Suede® Durango™ / Hypothenar and handlebar contact-point reinforcements in synthetic leather / 2 mm foam rubber reinforcements on the palm / 3 mm foam rubber pads on the thumb
03. Double FIVE ERGOPROTECH™ protective shell in soft TPR, practically imperceptible
04. TPR mini protective shells on the fingers + 3 mm foam rubber reinforcements on the ring and little fingers
05. 5 TPR Sonic thermo-welded protective logo
06. FIVE ERGOFIT™ construction that optimizes fit and allows fingers extensive freedom of movement
07. Synthetic leather reinforcement on the edge of the hand, up to the radius
08. Silicone print on the inside of the fingers, for optimal grip on the controls
09. Clear Vision Pad™ visor cleaning system on the left-hand side
10. Touch Screen™ system (on the index finger) that allows you to handle your Touch Screen™ devices
11. Mesh fabric and Velcro® adjustment tab closure integrated into the glove's construction

ENDURO.AIR

Facing the elements, high elevation, and nature, Enduro is a demanding, total sport that can potentially push a rider to their limits...Therefore, ventilation becomes crucial. The aggressive nature of the terrain nevertheless calls for at least some protection. The ENDURO AIR offers the ideal combination to protect against small snags (rocks, branches, etc.) while allowing for efficient airflow. For this, we have combined 2.2 MicroMesh and Twill Span on the topside of the glove for effective ventilation and have added just the right amount of protection using 4 mm TPR Sonic elements on the hand and 2 mm on the outside fingers, the most exposed area. The palm in AX Suede® DEUCE synthetic suede leather offers impeccable handlebar grip and reduces the risk of blisters, without any other added elements than Silicone Print dots on the index and middle fingers and thumb, for optimal grip on the controls. Its thumb is covered in MicroWipe™, a micro-terrycloth fabric that allows you to wipe away any sweat from your brow. And, since in Enduro, you may have to use a GPS or smartphone, each of the index fingers has at its tip a triple band of Touch Screen™ conductive wire that allows you to handle device screens. Its closure is ensured by a solid Soft TPR + Velcro® adjustment flap, for perfect fit. In other words, this glove has everything you need to endure enjoyably, over the long haul.

TECHNICAL FEATURES

01. Topside construction / 2.2 mesh + Twill Span
02. Palm / AX Suede® DEUCE
03. Closure and support / Topside TPR and Velcro® adjustment flap, Twin span folded, seamless cuff, With Pull'N'Ride™ tab
04. New pre-formed FIVE ERGOFIT™ construction with Lycra™ Stretch micro-fourchettes
05. Right and left conductive index fingers for smartphone use
06. MicroWipe™ / Thumb covered in micro-terrycloth so you can wipe off your forehead
07. Logos / 4 mm Sonic Soft TPR (on the hand) + 2mm (on the fingers)

XR.TRAIL PROTECH EVO

You may be looking for a versatile, lightweight, soft and comfortable glove, but protection if you take a spill is still a crucial factor when you're going all out on your mountain bike, or even when you choose the safer option of an electric bike. With this in mind, we present the XR TRAIL PROTECH EVO. It echoes all the comfort and versatility of the XR TRAIL GEL, particularly its multiple gel inserts on the palm, but adds in an essential element in the form of a new one-piece ERGOPROTECH™ protective shell developed (with protected design) by FIVE; it's supple enough not to hinder your movements, and rigid enough to limit the impact of chance encounters with branches or pebbles. And let's not forget its many phalangeal reinforcements. The Soft TPR 3D tone-on-tone FIVE logo on the most vulnerable metacarpal zone (outer side) adds an understated reinforcement that doesn't hinder your movements. The XR TRAIL PROTECH EVO: the perfect glove to handle all the subtleties of all-out riding, while it protects you from the risks posed by nature's little traps.

TECHNICAL FEATURES

01. Topside construction / Spandex®
02. Palm / AX Suede® DEUCE
03. FIVE ERGOPROTECH™ soft metacarpal protective shell
04. Palm, thenar, and hypothenar reinforcements / 3 mm AIR GEL®
05. Silicone Print for optimal grip on the handlebars / index + middle finger + thumb
06. Closure and support / TPR and Velcro® topside adjustment tab / Trim- and seam-free ergonomic neoprene cuff / Pull'N'Ride™ pull tab
07. New FIVE ERGOFIT™ preformed construction with Lycra™ Stretch micro-fourchettes
08. MicroWipe™ / Micro-terry covering the base of the thumb, so you can wipe off your forehead
09. Touch Screen™ / Compatible with smartphone and GPS Touch Screen™s (right and left index fingers)

XR.TRAIL GEL

Though, as specialists, we develop and recommend specific styles for each type of use, we thought it would be useful to offer a universal, multipurpose glove that offers maximum comfort for a long day's ride. And so, we proudly present the XR TRAIL GEL. It will be your faithful companion for all your days out, on any kind of terrain. Its topside construction in 4-Way Spandex®, a material famous for its elasticity, makes it truly comfortable. Its 3D logo guarantees just the right level of protection on the highly exposed metacarpal zone (outer side) without hindering your movements in any way. Its AX Suede® Deuce synthetic suede leather palm, featuring numerous 3 mm AIR GEL® inserts, offers an exceptional level of comfort at the handlebars and reduces the risk of blisters. The XR TRAIL GEL has adopted the new FIVE ERGOFIT™ construction, with its micro-fourchettes (in Lycra™ on this style), providing an ultra-ergonomic fit. The base of the thumb is covered in MicroWipe™ terrycloth, so you can wipe away the sweat from your forehead when you're getting a real workout. A silicone print on the inside of the index and middle finger and thumb enhances grip on the controls, and the addition of conductive Touch Screen™ threads on the index finger allows you handle smartphone or GPS screens. The customized fit of the XR TRAIL GEL comes from its Soft TPR and Velcro® flap that's integrated into the clean-cut neoprene cuff, and from its Pull'N'Ride™ on-off tab. Though it's visually understated, with its tone-on-tone logos, you'll also forget it's there when you wear it, because it's so comfortable, lightweight, and efficient. The XR TRAIL GEL is sure to satisfy a wide range of riders, starting with those who are new to any kind of Electric Bike.

TECHNICAL FEATURES

01. Topside construction / 4-Way Spandex®
02. Palm / AX Suede® DEUCE
03. Palm, thumb, and metacarpal reinforcements / 3 mm AIR GEL®
04. Silicone Print for optimal grip on the handlebars / Index finger + middle finger + thumb

XR.PRO

The XR PRO reflects our vision of a multipurpose glove for high performance and competitive riding. Covering a wide range of uses, it is as efficient on the road and on gravel as it is for off-road use (whatever the discipline: cross-country, all-mountain, Enduro, downhill), and will even satisfy the most extreme gravity riders (Slope Style, Dirt, etc...). It features an elasticity and thinness that allow it to literally disappear on your hand. Nevertheless, it also offers a real plus in terms of comfort and handlebar grip. The XR PRO allows you to adjust the wrist closure the way you want, and its 3D logo guarantees just the right protection on the most exposed metacarpal zone (the outer side) without hindering your movements in the least. This is the most popular glove with our official riders, across disciplines, proof of truly exceptional performance.

TECHNICAL FEATURES

01. Topside construction / Sublimated 2.2 Mesh
02. Palm / AX Suede® CINCO
03. Silicone Print for optimal grip on the controls / Palm + fingers + thumb
04. Closure and support / Topside Velcro® adjustment flap, Seamless hemmed Lycra™ cuff, Pull'N'Ride™ on-off tab

XR.LITE

The XR LITE is the most multifunctional and lightweight style in the FIVE bicycle Advanced Gloves range. It's easy to use and effective for a number of different disciplines, from cross-country to downhill, Enduro, or BMX, offering ease of movement without restraint and ultra-precise contact with the handlebars and controls. It enjoys a quick on-off system without a strap, featuring a Pull & Ride tab that allows you to easily adjust its positioning. Wrist support is provided by a slim stretch Neoprene band. The extreme comfort and feeling of lightness of the XR LITE stem from the use of Polyester Mesh, a stretch material that is ultra-thin, but durable, and perfectly molds to the shape of your hand on its topside, as well as to the use of the new FIVE ERGOFIT™ construction with micro-fourchettes (between the fingers), which seeks to optimize fit and freedom of movement for the fingers. The palm, made in AX Suede® Cinco, a synthetic suede leather for ultimate comfort, features a silicone print for optimal grip. The XR LITE is also equipped with a Touch Screen™ system on each index finger so you can handle your electronic devices without removing your glove. This is the perfect glove for those who want thinness, light weight, and easy on-off.

XR.RIDE

Focusing on the essentials doesn't mean being satisfied with the absolute minimum. Though the XR RIDE seeks to be straightforward and affordable, it offers more than you might think. At first glance, it offers the sensation of wearing nothing on your hands, but you immediately feel better grip at the controls with it on than without it. Its palm is smooth, without any reinforcements whatsoever, so you can really get a better feel for the landscape, yet it offers sufficient grip on the handlebars to ride in total relaxation and confidence. Its stretch topside construction is ventilated, and its fabric and Velcro® adjustment tab leaves your wrist unhindered. The same goes for the Touch-Screen system that allows you to handle device Touch Screen™s, for those who like to stay connected while they ride. Such are the many elements that make the XR RIDE an essential riding companion. Just put it on and... Ride!

TECHNICAL FEATURES

01. Topside construction / Britex Polyester Mesh
02. Palm / AX Suede® Cinco™, micro-perforated for ventilation
03. Silicone Print on the palm for optimal grip on the handlebars
04. Closure and support / Soft TPR and Velcro® topside adjustment tab on the upper part of the cuff / Pull'N'Ride™ pull tab
05. Lycra™ stretch fourchettes between the fingers
06. Sublimated logo

VENTILATION

Worn by 2018 BMX World Champion Sylvain André, the RACE features everything a modern rider might need. Lightweight and ultra-protective on the palm side, to withstand sliding on banked asphalt turns, RACE offers unparalleled comfort and precision. Its topside construction in sublimated Polyester Mesh and 2.2 Mesh provides a perfect fit on the hand, while allowing airflow, thus reducing the risk of blisters. The palm in AX Suede® Cinco synthetic leather hosts a Kevlar® reinforcement, a material that features high abrasion resistance, right at the contact zone with the ground if you fall. This small piece of Kevlar® makes all the difference! Silicone print adds the right amount of grip on the palm and the index finger, to help you truly master the controls. The thumb features independent construction from the rest of the glove, for improved fit. The thumb also contains additional reinforcement at the grip contact point. Stunning 2 mm Sonic super-soft TPR on the top, and 1 mm on the index finger, combine visual appeal and protection. Finger mobility and ventilation are optimized with the use of 2.2 Mesh for their contours. Support is provided by a soft TPR and Velcro® adjustment tab positioned on top. Like it did for Sylvain, the RACE will take you right to the top of the podium.

GLOSSARY OF **TECHNICAL ICONS**

KNUKLES PROTECT

Metacarpo-phalangeal joints protective shells

GRIP CONTROL

Silicone print for improved grip on controls

GRIP PALM

Silicone print on the palm for enhanced grip on the handlebars

TOUCH SCREEN

Compatible with touchscreens devices

FIVERGO-FIT

Innovative finger contour construction with reduced seams for ergonomic fit and increased mobility

GEL PALM

Gel insert in palm to absorb shocks and vibrations for greater comfort

MICRO-WIPE

Thumb or index covered in micro-terrycloth to wipe-off glasses / goggles or forehead sweat

PHALANGE PADS

Reinforcement pads on phalanges

PALM SLIDER

Protective shell on the hypothenar

LEATHER

Genuine leather construction

ABRASION RESIST

Anti-abrasion Epoxy resin reinforcement on palm

COMFORT PAD

Comfort padding to absorb vibrations on handlebar at thumb/hand joint zone

VENTED PALM

Vent holes in palm for optimum airflow

REFLECTIVE

Safety reflective details for low-light or bad weather visibility

VELCRO STRAP

Closure and adjustment system by Velcro strap

PULL'N'RIDE

Tab on wrist for easy pull-on

FLEX-WRIST

Ergonomic elastic cuff on wrist with no closure strap for easy & quick pull-on

THERMO LINING

Thermal insulation lining for warmth retention in cold weather conditions

X2 SKIN EFFECT

Next-to-skin comfort

EASY PULL-OFF

Pull loops for easy removal of gloves

WATERPROOF

Weatherproof breathable membrane to keep hands dry in wet conditions

WIND BREAK

Windproof fabric or membrane

WATER REPELLENT

Water repellent fabric Allows water drops to slide over glove surface
